Aim: To create a visual representation showcasing the differences between various multiple access techniques.

Procedure:

1. Open Figma and create a new design file.
2. Create a frame for comparing multiple access techniques.
3. Add separate sections for FDMA, TDMA, CDMA, and OFDMA.
4. Draw diagrams showing how each technique shares communication resources.
5. Label frequency channels, time slots, codes, and subcarriers.
6. Add the advantages and applications of each technique.
7. Use different colors and a comparison table to present the differences clearly.
