Experiment 14: GPRS Operation Flowchart

Aim: To develop a flowchart explaining the operation of General Packet Radio Service (GPRS).

Procedure:

1. Open Figma and create a new design file.
2. Create a frame for the GPRS operation flowchart.
3. Add the mobile station as the starting point.
4. Add BTS and BSC to represent the radio access part of the network.
5. Include SGSN for mobility management and GPRS session support, and GGSN for connectivity to external packet networks.
6. Connect the components with arrows to show packet transmission and add authentication and connection decision points.
7. Apply different colors and labels, then review the complete flowchart.

Output:

https://www.figma.com/make/k9Zgf520XlpTl5AvzCWiaM/EXPERIMENT-14?t=EgmerP76fgHXnljb-0

Result: Thus, a flowchart explaining the operation of GPRS and packet data transmission was developed successfully using Figma.
